Renewed points through this upgrade

If you upgrade your navigation system by these discs, the system will have the following changes.

Renewed points for all models

Renewal Map database

The Map database will be changed.

Wide variety of facility information for Points of Interest (POI) search

Approximately 2 million POIs are included in the database.

- The categories that you can use for voice recognition also will be changed. To know the categories that you can vocalize, see the displayed voice help.
- Some facilities icons used in **POI Search**, **Vicinity Search**, and **Overlay POI** will be changed.

Triple Disc

This package is adopted “Triple Disc” system so as to contain larger database and expanded coverage area; for the west, for the central, and for the east.

You can use a disc according to current location or destination, so that you can get comfortable operation at the long-distance navigation.

Configuration of data recorded on discs

Due to expanding the map database and the limitations of the disc's storage capacity, the following contents in the Central area disc have been changed.

- **Search data for Austria and Denmark are deleted.**
The search data for Austria and Denmark are deleted from the Central area disc and become available only on the East area disc. To search maps of Austria or Denmark, use the East area disc.
- **The coverage of lower scale maps on the Central area disc is reduced.**
The coverage of lower scale maps of the northern and eastern borders on the Central area disc is reduced.

The database and lower scale maps stored on each disc are as follows:

West area disc

Central area disc

East area disc

Renewed points through this upgrade

Note for cross-disc routing

If your current location and the destination are stored on different discs, it is necessary to change discs on the way.

In the case of such cross-disc routing, the following procedure is recommended.

1 Insert the disc containing the destination you want to set.

2 Search for the destination and set as your destination.

3 After route calculation finished, remove the current disc.

4 Insert the disc containing your current location.

- ☐ The navigation system reboots automatically remembering your destination and route set.
- ☐ To play DVD-video or CD, remove the DVD Map Disc after the “Memory navi indicator” stops flashing.

5 Drive toward your destination.

- ☐ When you approach the areas not stored on the current disc, the navigation system informs you of approaching that area. Replace the disc at that time.
- ☐ Removing the disc and inserting another disc causes the navigation system to automatically restart and reload the new route. (This automatic “Reroute” operation cannot be cancelled.)

Renewed points for AVIC-X1 or AVIC-X1R

Changes to appearance

The appearance of the navigation menu and AV menu will change as follows:

Navigation menu

AV menu

Renewed points for AV source

Source icon

The icon design for each source will be changed.

[ESC] touch key

The name of some of the touch keys will be changed from [ESC] to [HIDE].

Renewed point in the MP3 operation screen

The folder icon will be added to the [UP] touch key.

The file extension (.mp3) will be displayed after a track in the track list display and detail Information display. (The extension may not be displayed if the file name is long.)

Renewed points through this upgrade

Easy operation for expanded coverage (Country selection table)

The screen to select a country you want to search during a search step ("Country selection table") will be changed to a table format to comply with expanded coverage area. Select a country you want to search from the table.

Limitation of Functions for Areas not Stored on the Disc

For areas not stored on the disc, the functions will operate as follows:

Displaying the map

- Maps with a scale of between 25 m and 200 m cannot be displayed. (If the scale was set to between 25 m and 200 m, it is automatically switched to 500 m.)
- When driving with **Mixed Mode**, **St.List Mode** or **Driver's View**, upon entering an area not stored on the disc the display automatically switches to **Map Mode**. (When the vehicle reenters an area stored on the disc, the display returns to the previous map mode except for **Driver's View**.)

Destination search

- You cannot search a destination in an area not stored on the disc using **Address**

Search, POI Search, Vicinity Search or Postal Code Search.

- If you cannot search in a currently selected country, the system may forcibly switch to the country selection screen.
- A **Motorway Search** covers all areas, regardless of the disc on which the information is stored.
- If a **Vicinity Search** is performed on the border of an area not stored on the disc, the system will not necessarily select the nearest facility. (The search will take place only within the range of areas stored on the disc.)

Guidance

- When your vehicle approaches an area not stored on the disc, you will be notified three times: when the distance to the area not stored on the disc is 20 km (12 miles), 10 km (6 miles) and 5 km (3 miles) respectively. When your vehicle enters that area, a caution is given.
- In the areas not stored on the disc, only guidance for reaching the destination is provided. No other guidance is given.
- If a route calculation is operated within an areas not stored on the disc, the route might not be set from the streets you are currently driving. Also, if you set the destination in an area not stored on the disc of the disc, the system may not be able to set the route up to the destination.
- If the vehicle deviates from the set route in an area not stored on the disc, the Auto Re-route function will not work.
- Even if "**Close-up of Junction**" is "**On**", the display will not switch to an enlarged map of the junction.
- Even if you drive on the motorway, lane information, motorway exit numbers and motorway signs will not be displayed.

Renewed points through this upgrade

Route information

- If the set route goes through an area not stored on the disc, no route profile for that area will be displayed. (If the set route traverses both an area not stored on the disc and area stored on the disc, only the route profile within the area stored on the disc will be displayed.)
- Route scrolling for an area not stored on the disc is possible only with a map scale of 500 m or above.

Other function limitations

Memory mode

- Only data for areas stored on the disc can be memorised. (Data for areas not stored on the disc cannot be memorised.)
- If the vehicle enters an area not stored on the disc, preparation for memory navi mode will have to be redone after the vehicle returns to an area stored in the disc. (Preparation for the memory navi mode starts from the location where the vehicle re-entered the area stored on the disc.)

Avoid area

An area not stored on the disc cannot be set as an Area to Avoid.
☐ A set **Areas to Avoid** may be deleted when the software is updated. If this happens, the system will automatically try to recover the deleted information, but data can be recovered only for areas stored on the disc. For items that could not be recovered, a recovery process will begin when you set another disc.

Recovery process for memory navi and avoid area

The memorised area may be deleted in the following circumstances:

- Yellow lead of the navigation system or the vehicle battery is disconnected.
- **RESET** button is pressed.
- Navigation software is updated.
- ☐ In these circumstances, the system will automatically try to recover the deleted information, but data can be recovered only for areas stored on the disc. For items that could not be recovered, a recovery process will begin when you set another disc.

Light grey touch panel key

The function is not available during memory navi mode. Or, the function is not available for areas not stored on the disc. Touching this button activates a message indicating that the function is not available. In memory navi mode and/or when traversing an area not stored on the disc, selection of the scales is limited. ☐

Messages and how to react to them

The following messages are added to those of AVIC-X1R (CNDV-50MT):

Message	When	What to do
This area does not contain any POI's of the selected type.	Vicinity Search cannot be performed because the searched location is in areas not stored on the DVD Map Disc.	Replace the DVD Map Disc and perform Vicinity Search again.
This country is not available on the disc. Please insert an appropriate disc.	When countries not stored on the DVD Map Disc are included in the search.	Set the destination or way point(s) in the countries stored on the DVD Map Disc, or replace the DVD Map Disc and perform the search again.
Failed to make the route profile.	Failed to generate the route profile because the set route passes through areas not stored on the DVD Map Disc.	Insert the DVD Map Disc and retry.
No route data can be stored. You should insert the disc that contains the map data of the current position.	The area to be set for [Map in Memory] is "areas not stored on the DVD Map Disc".	• Change the memory area to be set to "areas stored on the DVD Map Disc". • Insert the DVD Map Disc containing that area.
• Scaling down. • Scaling up.	In the memory navi mode, if the DVD Map Disc is inserted without changing the scale (only when the point is stored on the DVD Map Disc).	The scale automatically returns to the scale that was set in the DVD navi mode before being changed to the memory navi mode.
